ZOBIA AKBAR

JUNIOR FULL-STACK WEB DEVELOPER

zobbdhillon@gmail.com | LinkedIn: linkedin.com/in/zobdhillon | GitHub: github.com/zobdhillon | Portfolio: zobdhillon.netlify.app

PROFESSIONAL SUMMARY

Computer Science graduate with six months of internship experience in full-stack web development. Worked with Laravel, PHP, MySQL, JavaScript, Bootstrap, backend development, database and API integration, debugging, and web application maintenance. Built independent projects including an AI interview-practice platform, a developer learning log, a client portfolio website, and a resume builder, all deployed live. Seeking a remote junior developer role.

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, HTML5, CSS3, SQL
Backend: Laravel, REST API integration, Groq API (AI integration)
Frontend: Vue 3, React, Inertia.js, Tailwind CSS, Bootstrap
Database & Tools: MySQL, Git, GitHub, Vite, Railway, Netlify

EXPERIENCE

Full-Stack Web Development Intern | Code Cubics
1 April 2026 – 30 September 2026

- Developed backend features for full-stack web applications using Laravel, PHP and MySQL.
- Handled database integration, working with queries and relationships for application data.
- Integrated third-party and internal APIs into web applications.
- Debugged issues and maintained existing web applications to keep them stable.
- Built responsive interfaces with HTML, CSS, JavaScript and Bootstrap.

PROJECTS

Rehearse AI — Interview Practice Platform
Laravel, Vue 3, Inertia.js, MySQL, Groq API

- Built a platform that simulates real interview conversations and gives instant AI feedback on clarity, confidence and adaptability.
- Implemented AI scoring through the Groq API so each practice session is evaluated automatically.
- Added scenario-based sessions, session tracking and PDF export for a complete end-to-end practice flow.

Live: rehearse-aicoach.up.railway.app | Code: github.com/zobdhillon/Rehearse

DevLogs — Developer Learning Journal
Laravel, PHP, MySQL, Blade, Tailwind CSS

- Built a full-stack platform where developers create posts, track learning progress and goals, and share learning resources.
- Implemented authentication, a personal dashboard and an activity feed.
- Integrated an AI coaching feature (Groq API) that generates personalized learning insights from a user's topics, logs and goals.

Saba — Copywriter Portfolio (Client Project)
HTML, CSS, JavaScript

- Designed and built a responsive portfolio website for a professional copywriter, from scratch and without a framework.
- Added smooth scroll interactions and deployed the site live on Netlify.

Live: sabach.netlify.app | Code: github.com/zobdhillon/SabaCh

Resume Builder
PHP, Laravel, JSON, DomPDF

- Built a resume generator that renders a complete resume from a single JSON data file, keeping content separate from presentation.
- Generates a printable resume/PDF with DomPDF and is deployed on Railway.
